

REMARKS

At the outset, the Applicant wishes to thank Patent Examiner Nasser Ahmad for the many courtesies extended to the undersigned attorney during the Personal Interview on July 26, 2006, at the U.S.P.T.O. The substance of this Personal Interview is set forth in the Examiner Interview Summary, and in this Amendment.

The amendments to this patent application are as follows. Rejected claims 21 and 30 are being cancelled; new claims 31 and 32 are being added; and the dependency of claims 27, 28, and 29 is being changed to depend from new claim 32. Please note that the new claims 31 and 32 do not utilize the objected-to terminology "simultaneously."

New claims 31 and 32 are limited to a process for producing a "six layer composite material" which is similar to the type of process and product for which Applicant's related *U.S. Patent No. 6,777,053* was granted.

For convenience, a copy of *U.S. Patent No. 6,777,053* is enclosed. The difference between the claims of the granted patent and the new claims 31 and 32, is that the first and second web in new claims 31 and 32 enclosed herewith are limited to a Markush

Group consisting of paper, metal foil, and non-woven fabric;
whereas in the granted patent, the first web film and the second
web film are both plastic.

In this Final Office Action dated April 18, 2006, all of the
rejections over prior art have been withdrawn. The only rejection
set forth in this Final Office Action is a rejection under
35 U.S.C. 112 based upon the introduction of new matter. However,
because the rejected claims 21 and 30 have been cancelled, and
because new claims 31 and 32, do not recite any objected-to claim
language, this rejection is believed to have been now rendered
moot.

Withdrawal of this ground of rejection is respectfully
requested.

Entry of this Amendment; and a prompt notification of

allowability is respectfully requested.

Respectfully submitted,
WALTER GÜNTER -2 PCT
